The article about Squadron Manager in the game.

(This article is currently under construction!)

1 Information

The Squadron Manager is a primary command asset for effectively managing and organising all units that are currently under control of the host station.

2 Overview

The Squadron Manager can be accessed from the user interface menu, or by pressing 'S' key during the gameplay. Like the Map screen, the Squadron Manager window can be fully re-sized and re-positioned at anywhere on the display screen by the player to suit their preferences.

3 Functions
