

Satellite

Table Of Contents

- [1 Information](#)
- [2 Overview](#)

Satellite is a unit class/type for satellite types of aircraft units.

(This article is currently under construction!)

1 Information

Satellite types of units (also known as 'UFO' in the internal data script) comprise all satellite aircraft units which are used for reconnaissance in the game. The satellite types of units do not have any weapons and have rather unique flight characteristics under both AI and User control layers.
