Primary objective and description about the Urban Assault Wiki Restoration Project.

1 Information

[Urban Assault](#) Wiki Restoration Project is currently under progress. It will be a long term plan since there are numerous lost data and information to be restored while meeting the quality standard of the articles. Additionally, the standalone UA wiki websites for more classic wiki designs/layouts and easier online access is also planned as well. Please excuse the work in progress!

2 Overview

Index Page contains some useful information about our Wiki. Most wiki articles are not finished and currently under construction. Once the text portion of the most articles are finished, pictures and other supplementary layout contents will be gradually added there as well. All contents are fact-checked and fully verified from either the original game sources or game data.

3 Status

Currently, the majority of wiki articles are unfinished and under construction. Other main wiki content such as images or videos will be gradually added later. The current priority is restoring/reworking plain text information for the articles first. Additionally, comments on Wiki are disabled at the moment since most articles are under construction and to avoid spam.

4 Feedback

Most wiki articles are planned to be re-written from the scratch and will be periodically worked on. If you have any suggestions for particular UA topics, then please contact the administration so the creation of information articles about those topics can be prioritised. All contents here are fact-checked and fully verified from either the original game sources or game data.
