The article about the various skybox models and graphics data in the game.

(This article is currently under construction!)

1 Overview

In [Urban Assault](#), there are many different types of skybox models and textures which greatly enhance the atmosphere of levels. This article lists the file names of the skybox data and related information.

2 Sky Lists

In the final version of the game, there are total 72 different sky object files.

In the development/beta builds of the game there were 18 extra sky object files that were eventually scrapped in the final version of the game. Therefore, there are total 90 sky object files.

(To Do: Add all sky data files from the retail version and beta versions, and then later add pictures as well.)
